

Single Family

2341 SQFT

3 Beds

2 Baths

PROPERTY DETAILS

Beautiful mountain property with character for the savvy buyer who is looking for value. Garden, star gaze, or relax in an indoors, four-season spa. This home has three bedrooms with the lower BR used as an office and exercise area. The family room is in the geodesic portion of the home which opens up through french doors, leading to a kitchen and breakfast nook. This is a great home for families that would like a separate entrance in the back, providing privacy and warm architecture. Owners currently use the upstairs bedroom which has recently replaced sky lights. Take a ride to Breckenridge and be there in 1.5 hours, drive to downtown Denver in about 45 minutes, or just go fishing in a world class trout stream in less than 10 minutes. There is plenty of room for parking with a two car garage, a car port, RV space, and room for guest parking on this gently sloping, 2-acre lot. New well pump installed (7/8/2019)
